

AMENDMENTS TO THE SPECIFICATION

Please insert the heading, "TECHNICAL FIELD" on page 1 following the title but before the paragraph beginning on line 8.

Please insert the heading, "BACKGROUND OF THE INVENTION" on page 1 following the paragraph ending on line 10 but before the paragraph beginning on line 12, which reads, "Melamine, whose structure is represented by the formula I..."

Please insert the heading, "DESCRIPTION OF THE INVENTION" on page 3, after the paragraph running from line 17 to 21 and before the paragraph running from 22 to 27.

Please insert the following section on page 7 after line 6, before the examples.

BRIEF DESCRIPTION OF THE DRAWINGS

Fig 1 compares the catalyst deactivation of calcined silicon-doped aluminumoxide (A) with the buildup of organic deposit (B) over time (C).

Fig 2 compares the catalyst deactivation of calcined aluminum oxide (A) with the buildup of organic deposit (B) over time (C).

Fig 3 compares the catalyst deactivation of uncalcined aluminosilicate of the montmorillonite type (A) with the buildup of organic deposit (B) over time (C).

Fig 4 compares the catalyst deactivation of uncalcined aluminosilicate of the monmorillonite type (A) with the buildup of organic deposit (B) at 400°C at a pressure of 1.5 bar over time (C).
